

*Unless you suffer from varicose veins,  
“the latest beach fashions” don’t usually go all the way to your toes.*

**Let us help find a way to uncover something better.**

**Let’s face it.** Most women who suffer from varicose veins don’t look forward to showing them in public. Simple warm-weather activities can have a devastating effect on your self-confidences. Even worse, varicose veins can be painful and make even everyday activities harder to do. The good news is that now is a great time to discover our medically advanced laser procedure, which can eliminate varicose veins without surgery. You’ll experience minimal discomfort and no downtime, so the upcoming seasons are something you can look forward to! What’s more, results are immediate and last forever in 97% of cases.

Maybe it’s time to quit covering your varicose veins, and make them REALLY go away. For more information, call Veradia at **338-9740** and schedule a private consultation with Dr. Matthew Casey or Dr. Khalil Yousef.

Veradia™ is a division of **MedXray**
